

## PROBLEM CORNER

This month's challenges involve finding the central angles of two curves, and finding the missing side dimensions of a parcel. Solutions can be found on our website at [www.profsurv.com](http://www.profsurv.com).

### Problem 35

From the given information, what are the central angles of the two curves?

### Problem 36

Find the missing side dimensions.

The problems for this column are contributed by retired California surveyor Dave Lindell, LS.
