

Problem  
**229**

by Benjamin Bloch, Ph.D.

In this survey map of a farmer's field, the total area enclosed is 56 square meters. All marked angles are 90 degrees. It is found that  $a = \frac{4}{3}c$ . All distances are in meters.

From this information, determine the distances  $a$ ,  $b$ , and  $c$ .
